

3rd International Conference of The Society of Respiratory Researches and Paediatric Nutrition

**President of the
Society and Conference**

PROF. HALA GOUDA EL NADY

**31st October - 2nd November 2019
Cairo, EGYPT**

Session 1:

Pediatric Pulmonology & Respiratory Disorders

Discuss common respiratory, allergic, and immunologic diseases in children. This session will represent the latest research work on the most common chronic respiratory illnesses of children and Pediatric Allergy

Session 2 :

Pediatric Vaccines & Immunization

This session target is to explore the advanced research in the field of vaccination. Vaccines are now recommended universally for infants, children, and adolescence. In addition, increased emphasis has been placed on removing barriers to immunization, eliminating racial/ethnic disparities and addressing vaccine safety issues.

Immunization is the procedure which empowers the individual body against consequent contamination or sickness..

Session 3 :

Pediatric Nutrition & Breast Feeding

We will provide a unique platform for discussing the interplay between nutrition and growth in children, pediatric early nutrition and its effect on growth, body composition and later obesity.

Also discuss how to achieve optimal growth in preterm infants and the long-term metabolic / endocrine and cognitive outcomes of prematurity as a consequence of early nutritional management

Session 4:

Antibiotics and Antibiotic Resistance:

The Emergence of Antimicrobial Resistance (AMR) is now recognized as real threat to global health and security. So we have to discuss a policy on AMR at a regional and national levels with a view to making recommendations as to how policy might be improved. Discuss how to encourage the physicians to prepare and follow The hospital antimicrobial guidelines

Session 5:

Pediatric Endocrinology

This session deals with disorders of the endocrine glands. Type 1 diabetes mellitus is the most common disease that accounts for at least 50% of a typical clinical practice and the incidence of type 2 diabetes mellitus has increased in children and adolescents and is linked to the rise in childhood obesity. Since Type 2 diabetes mellitus and its comorbidities are risk factors for vascular disease; it is basic for health care providers to distinguish and treat children and adolescents with this disorder.

Growth disorders are another most common problem will be discussed.

5 Workshops

- What and Why Do We Vaccinate ?
- Train the trainer (All about Inhalation Therapy)
- Breastfeeding: The true foundation of infant nutrition
- Neonatal pain: Assessment and treatment
- Pediatric Physiotherapy

Why to attend?

Our society conference provides the best platform for the largest gathering of experts in the field of Pediatrics. Meeting gathering consolidates workshops , symposiums , panel discussions and practical presentations by the most distinguished speakers. The latest updates in the field of pediatrics are the hallmarks of this two-day conference.

Target Audience:

- **Pediatricians**
- **Neonatologists**
- **Young Researchers**
- **Residents**
- **Nutritionists**
